iLA Smart Home Automation

Next-generation home automation company founded in 2026 in Hyderabad, India, by a team of highly experienced software professionals with over 15 years of expertise in software development, IoT systems, and intelligent technology solutions. Built on a strong foundation of innovation and real-world industry experience, ILA Smart is dedicated to transforming ordinary homes into intelligent, connected, and energy-efficient living spaces. The company focuses on delivering cutting-edge home automation solutions that enhance comfort, security, convenience, and lifestyle efficiency for modern homeowners.

Home automation is no longer a luxury—it is becoming a modern necessity. As lifestyles become faster and more dynamic, smart homes provide control, safety, and efficiency at your fingertips. With automation, homeowners can manage their entire house remotely, reduce manual effort, and enjoy a more comfortable and secure living environment. The biggest advantage of home automation is control and peace of mind. Whether you are at work or traveling, you can monitor and manage your home in real time. It also significantly improves energy efficiency, helping reduce electricity bills by optimizing usage of lighting, air conditioning, and appliances.

Main Door Locks

VINTAGE ROYAL

The Vintage Royal hooking mortise lock is a perfect fusion of timeless design and advanced security engineering, crafted to deliver both elegance and reliability. Built with a precision-engineered hooking mechanism, it ensures enhanced locking strength and superior resistance against forced entry, making it an ideal choice for premium residential and commercial spaces.
